## The New Cart for iPad

The New Cart for iPad is the newest and most intelligent product developed by PC Locs. It features the latest in design, technology, and functionality to make the use of iPads in any environment more efficient. Sync, charge and secure up to 32 iPads with the new Cart for iPad by PC Locs

### 32 bay iPad Cart – Sync & Charge

### 16 port Sync & Charge Box

- ✓ Manage the apps on your school set of iPads with the new PC Locs Sync box powered by the Cambriox C3 Case. The Sync box sits inside the cart and allows you to sync up to 16 iPad devices simultaneously or 32 per cart
- ✓ The PC Locs Cart for iPads features 2 large lockable drawers on opposite sides. This allows users to retrieve and return iPads quickly
- ✓ The iPads are stored in removable and light weight baskets. This allows users to carry pods of 8 iPads to different areas of a classroom easily
- ✓ The design is both functional and sleek. It features an elegant outer shell with an iPad inspired top; stainless steel handles and smooth rolling modern wheels

- ✓ The PC Locs Sync box has the added functionality of charging up to 16 iPads at one time. The box can also be configured to charge other devices such as tablets, slates and other mobile devices

## BACKUP SOFTWARE AND ARCHIVING

Built on a unique, single-platform architecture, CommVault solutions enable high-performance data protection, universal availability and simplified management of data on complex storage networks such as schools.

CommVault® Simpana® Backup, Deduplication, Archive, Replication, Search and Storage Resource Management software work together seamlessly, sharing a single code base and common function set, with innovative capabilities such as failover, data encryption, safeguarding removable media built-in as standard.

This allows schools that choose CommVault Simpana software to enjoy increased operational efficiencies, demonstrable return on investment, and reduced risk while lowering long term costs.

What are you interested in?

1. Archiving
2. Backup and recovery
3. Replication
4. Storage resource management
5. Deduplication
6. Virtualisation
