PHYSICAL ACTIVITY WHEN LEARNING AND TEACHING FROM HOME

Physical activity is important for the health and wellbeing of every student and teacher while learning and teaching from home. This collated list of no cost resources can be used to support movement throughout the day and may be selected and adapted to suit the age, interests, abilities, environment and needs of students and teachers.

Important notes: AISNSW encourages a whole-school approach to physical activity. These activities are not intended to replace PDHPE learning for students, but complement the PDHPE curriculum which involves exploring movement concepts with educative purpose. You may also like to view AISNSW Safety Considerations for PDHPE Learning from Home.

Physical activity recommendations for adults:

Accumulate 150 to 300 minutes of moderate intensity physical activity each week

- Boosts mood
- Helps to feel calmer
